

FACTSHEET

Performance Returns

The North MaxQ Macro UCITS Fund (USD Inst. Class) return for the August 2017 period (26th July 2017 to 30th August 2017) was **0.03%** bringing the year-to-date return to **-4.40%**.

Fund Overview

The North MaxQ Macro UCITS Fund is a global macro fund that seeks to generate absolute positive returns over a market cycle that is uncorrelated to other global macro managers, the broad fund universe as well as interest rate, foreign exchange and equity indices. The investment manager identifies micro-economic and country specific imbalances to develop views and corresponding trading strategies. These strategies provide a diverse source of alpha and are expressed through thematic, relative value, counter-trend and quantitative exposures. The exposures are constructed to offer the best asymmetric payoff, while minimising expected correlations and providing protection against downside gap-risk. The investment manager prefers to take risk across a number of different strategies. Risk is monitored in real-time at the strategy and portfolio level and individual strategy stop-loss limits are established at the inception of each trade.

Monthly Market Commentary

GDP releases confirmed that 2017 global growth will surprise to the upside, relative to market expectations. In contrast to the positive economic data, global interest rates have surprised to the downside. Further monetary policy tightening and balance sheet reduction by the Fed should have a substantive effect on asset prices. August economic data releases in the Eurozone remained positive, however stronger growth and improved employment data is not translating to a pickup in inflation, which continues to undershoot the ECB's forecasts. President Draghi struck an overall dovish tone at the September press conference, and made an effort to talk down the currency. This was not the market interpretation, with the EUR seeing renewed strength. Outside of the Eurozone, the Fund remains short Sterling, due to the continued Brexit uncertainty, drag from the current account and a slowing of the economy, which will keep the Bank of England on hold. The Fund remains long the Norwegian and Swedish Krone; both are undervalued on fundamental basis and supported by improving domestic fundamentals. Positive US economic data surprised to the upside and will allow the Fed to formally announce the implementation of its balance sheet reduction at its September meeting and to raise rates at its December meeting. The Fund remains long the USD mainly against the Australian Dollar, which remains rich on a fundamental basis and where the economic data releases are surprising to the downside.

Performance Attribution

Out of a total of 53 strategies that were active during the month of August, 22 had a positive return, 21 had a negative return and 10 were essentially flat. 5 strategies were added and 8 were closed. The figures below show the performance attribution across different regions and by strategy style.

THE MANAGER

Nick D'Onofrio is a Co-Founder, Managing Partner and Chief Executive Officer at North Asset Management. Nick has over 20 years of experience within the industry. Nick is a former Executive

Director at Morgan Stanley within the Finance Department and headed the credit risk team that focused on managing the inherent risk in the broad array of products traded at Morgan Stanley, including fixed income, foreign exchange, equities and commodities. Prior to Morgan Stanley, Nick worked at Swiss Banking Corporation and ABN AMRO. He holds a Bachelor's degree from Harvard University.
