

FACTSHEET

Performance Returns

The AlphaQuest UCITS Fund returned +0.45% in November (USD Institutional Founder Share Class).

Investment Objective & Strategy

The AlphaQuest UCITS Fund's investment objective is to seek capital appreciation over the long term.

The AlphaQuest UCITS Fund invests, on a long and/or short basis, in a globally diversified futures portfolio representing the major asset classes of equities, fixed income and currencies. The AlphaQuest UCITS Fund also gains exposure to commodities, on a long and/or short basis, through the use of structured financial instruments ("SFIs"). The AlphaQuest UCITS Fund targets, over the medium term, a realized volatility in the range of 10%-12%, in order to adhere to the UCITS investment restrictions.

Quest employs a systematic trading program (the "Program"), diversified by asset class and with individual positions intended to provide a return over different time horizons, that seeks to deliver positive alpha (alpha is a statistical measurement used to determine the risk-reward profile of a potential investment). The Program is composed of a number of trading systems, each of which generates individual trades. These trading systems generate trades on the basis of price movement indicators which seek to identify situations where there is potential for an increase in the price volatility of a given market. Risk controls are integrated into the Program to measure the potential risk associated with trades generated by the Program. Generally, the Program will determine that AlphaQuest UCITS Fund should take a long position in a market that has shown an upward trending price or a short position in a market that has shown a downward trending price.

Monthly Commentary

November was a mixed month as early strong gains were given back mid-month and then followed by a sharp recovery.

Among sectors, the best gains were generated in equities, where markets broke record highs seemingly on a daily basis. US and Japanese equities were the most profitable, while European equities detracted from returns. Foreign exchange also contributed to returns with our models capturing the gains in the Euro and British Pound during the month. Fixed income was a negative contributor to the portfolio in November as the sector continued the range-bound behavior it has demonstrated nearly all of this year, being caught between improving global growth on one hand and Central Bank asset purchases on the other. Commodities also detracted from performance, especially agricultural markets and gold, which traded in a very tight range and volatility fell close to its lowest level ever.

Among system families, the best performance came from our trend crowding models as well as our long-term models, which picked up the steady trends in equities. The short-term volatility breakout models and intermediate-term models, which trade time horizons of up to a few weeks, detracted from performance as price movements in markets remained highly compressed and volatility across several markets fell to new record lows.

THE MANAGER

Nigol Koulajian

Founder and Chief Investment Officer

Nigol has been designing and trading short and long-term technical systems for over 24 years. Mr. Koulajian began his career with Andersen Consulting and then moved to Deutsche Bank, where he helped create and computerize a risk management system that became a widely used tool for senior management. He then became the Head Trader for Carmel Capital and while working at Carmel

designed and priced hedges on international equity and fixed income arbitrage positions. In 1996, Mr. Koulajian joined Weston Capital Management, LLC where he was the Director of Asset Allocation and Product Development, responsible for the allocation of assets to equity hedge funds and CTAs. In 1998, Mr. Koulajian started Avalon Asset Management, LLC, a fund of funds, and in 1999, he co-founded a CTA, Enterprise Asset Management, LLC. Mr. Koulajian earned an MBA in finance from Columbia Business School and a BS in electrical engineering from Notre Dame.

Paul Czkwianianc

Head of Research

Paul joined the firm at its inception in 2001. Mr. Czkwianianc started his career in the financial industry in 1999 at Enterprise Asset Management where he worked alongside Mr. Nigol Koulajian. Mr. Czkwianianc holds a B.S. degree in Applied Mathematics from Columbia University and an M.S. degree in Mathematics from New York University.
