Performance Returns

The Conquest STAR UCITS Fund returned (0.15%) in November for the USD Institutional Founder class.

Investment Objective & Strategy

Systematic absolute return strategy focused on capturing independent alpha from short-term trading opportunities regardless of the risk environment in both “risk-seeking” and “risk averse” regimes. The fund employs 4 sub-strategies using a dynamic risk allocation based on the Conquest Risk Aversion Index. The strategy provides geographic and asset class diversification by trading in over 30 liquid global futures markets including currencies, equity indices, and fixed income with no correlation to traditional portfolios, hedge fund portfolios, and CTA portfolios.

Monthly Commentary

The broader stock market continued its rally in steady fashion, led by the US markets making several new all-time highs. Despite geopolitical concerns, anticipation of a tax deal being done before year end pushes stocks higher. Lack of inflation has kept bond yields less than exciting. Overall market sentiment remains strong heading into year end, but there are looming concerns warning for having such high valuations leading into 2018.

Conquest STAR UCITS Fund Performance

The Conquest STAR UCITS Fund attributed all of its gains for the month of November from equities; however the positive performance from stocks were offset by losses in both fixed income and foreign exchange. As discussed in previous commentaries, the potential shift in volatility across asset classes should benefit STAR UCITS Fund as we head into the end of the year.
